

VGA Video Adapter (AP1075) Instructions

Features:

The AP1075 is a VGA Video Adapter for Macintosh computers. It connects any Apple Macintosh® computer (built in 1993 or later) to any industry standard VGA monitor.

- Supports Multiple Scan Resolution Settings
- Power Macintosh® Compatible
- Limited Lifetime Warranty

Troubleshooting:

1. The monitor used must support the resolution selected. Supported resolutions are typically found in the User Manual that came with your monitor.
2. Check to make sure all cables and the adapter are firmly connected.
3. Make all installations with the power off.
4. If monitor is scrolling (not coming into synchronization), change the synchronization setting.
5. The multiple scan modes are for Power Macintoshes only. Multiple scan resolution settings allow you to switch resolutions “on the fly”, through the Monitor Control Panel. The following resolutions are supported by each mode:

Multiple Scan 14: 640x480 and 832x624

Multiple Scan 16: 640x480, 832x624, and 1024x768

Multiple Scan 21: 640x480, 832x624, 1024x768 and 1152x870

Switch Settings:

1. Choose a Synchronization Setting
2. Choose a Resolution Setting

Synchronization Settings

	Switch 5	Switch 6	Switch 7
Split Sync.*		ON	ON
Composite Sync.	ON		

Note: You MUST choose one of the above settings.

***Split Sync is the most common setting.**

Common Resolution Settings

Monitor	Switch 1	Switch 2	Switch 3	Switch 4	Switch 8	Switch 9	Vertical Refresh
VGA 640x480		ON	ON				59.95
SVGA 800x600	ON		ON				56
832x624	ON						75
1024x768	ON	ON					75
1152x870	ON	ON	ON	ON			75

Multiple Scan Resolution Settings*

Monitor	Switch 1	Switch 2	Switch 3	Switch 4	Switch 8	Switch 9	Vertical Refresh
Multiple Scan 14	ON			ON	ON	ON	Multiple
Multiple Scan 16	ON			ON	ON		Multiple
Multiple Scan 21	ON			ON		ON	Multiple

Other Supported Resolution Settings

Monitor	Switch 1	Switch 2	Switch 3	Switch 4	Switch 8	Switch 9	Vertical Refresh
